SafetyRail™

ADA-Compliant Pedestrian Barricade

Conventional Barricades are non-compliant.

Conventional barricades are **not continuous** barricades.

SafetyRail™ is ADA-Compliant.

SafetyRail™ provides **continuous, obstruction-free** guidance through the entire sidewalk closure.

SafetyRail™ Features

- Designed for use with Plastic Safety Systems' Wave® guide rail.
- The Wave's smooth surface and encapsulated ends provide safe guidance by hand and cane.
- No hardware or tools required for assembly.
- For ballast, fill SafetyRail with sand, or use sand bags.
- Stacks for easy transport and storage.
- Made from UV-stabilized high density plastic, for long life and durability.
